## The exotic fruits brand

Frutti Mundo specialises in exotic fruit flavours. We offer a varied choice of sorbets and ice creams, nectars, and syrup- mixers. Our products are chosen for their great taste and nutritional properties. Frutti Mundo combines simplicity and superior quality, together with freshness and experience.

Our products are guaranteed to satisfy anyone who appreciates premium desserts and beverages.

We sell directly to consumers and supply restaurants and bars that wish to provide their customers distinctive drinks and frozen desserts (sorbets, ice creams, and soft ice).

## Quality

Quality begins with our choice of raw materials. Our fruits are carefully selected by small - and medium - scale farmers who value natural agriculture and are skilled in packaging and freezing fruit pulps. Our supply chain connects farmers across the globe whose fruit cultivation is rooted in family tradition. Our products contain only finest quality ingredients sourced directly from their countries of origin. Frutti Mundo purchases some of its ingredients directly from producers and pays them a fair price. Besides our commitment to using only top quality ingredients, we have a special desire to support small - and medium-scale farming worldwide, producing goods that combine tradition and innovation. That's our idea of quality.

## Our Sorbets and Ice Creams
